

DO NOT FLUSH WIPES OR ANYTHING OTHER THAN TOILET PAPER

Due to COVID-19, schools are closed, people are working from home, residents are self-isolating, and there is a need to stay at home to practice social distancing.

The sewer wastewater in the Village of Carbon has increased significantly over the past few weeks and will continue to rise. At any time, please **DO NOT** flush any wipes of any kind. Wet wipes, baby wipes and personal wipes are all the same thing and are **NOT** flushable even if they say there are disposable. Wipes, contraceptives, feminine products and anything other than toilet paper can create a blockage that can only be removed manually (as shown in the photo below).

Please be mindful of what you are flushing to help keep our Lift Station working at full capacity.

Thank you for your cooperation as your actions truly do make a difference.
